

Project Demonstration Phase

The **Project Demonstration Phase** is the stage where the completed **ComicCraft – AI Comic Story Creator using Gemini Models** project is presented to the faculty, reviewers, or users.

Activities:

1. **Project Introduction** – Explain the purpose and objectives of ComicCraft.
2. **System Walkthrough** – Demonstrate the main features and user interface.
3. **AI Story Generation** – Show how Gemini generates comic stories from user inputs.
4. **Comic Creation** – Demonstrate character, scene, dialogue, and panel generation.
5. **Live Execution** – Run the application and show the complete workflow.
6. **Output Presentation** – Display the generated comic/story as the final output.
7. **Q&A Session** – Answer questions from the project guide or evaluators.
8. **Feedback Collection** – Note suggestions and identify possible future improvements.

Expected Outcome:

The demonstration proves that **ComicCraft works as intended**, integrates the required AI features, and provides a practical solution for creating comic stories efficiently.
