

Project Documentation Phase

The **Project Documentation Phase** is the stage where all information about the **ComicCraft – AI Comic Story Creator using Gemini Models** project is organized and recorded for future reference.

Key Activities

- Prepare the **project report** and documentation.
- Document the **project objectives, scope, and requirements**.
- Explain the **system architecture and workflow**.
- Document frontend, backend, and **Gemini AI integration**.
- Record database structure, APIs, dependencies, and configurations.
- Add **screenshots of the application** and generated comic stories.
- Document **testing procedures and results**.
- Include challenges faced and solutions implemented.
- Prepare **user instructions and installation steps**.
- Record future enhancements and possible improvements.

Main Deliverables

1. Project Report
2. System Design Documentation
3. API Documentation
4. Installation & User Guide
5. Testing Documentation
6. Screenshots and Results
7. Final Project Presentation
8. Source Code Documentation

Outcome: A complete and well-structured set of documents that explains how ComicCraft was designed, developed, tested, and used.
