STORY!

AI!

1

Brainstorming & Ideation Phase

- Identified the idea of an AI-powered comic story creator
- Convert a simple story prompt into a complete comic
- Brainstormed story generation, dialogues, illustrations, preview and PDF export
- Finalized the ComicCraft concept

WOW!

Requirement Analysis Phase

- Story prompt, character name, setting, tone and art style
- Generate a structured 5-panel comic outline
- Generate narration and character dialogues
- Generate comic-style illustrations
- Preview and download the final comic as PDF

WOW!

Project Design Phase

- Frontend: HTML, CSS and Jinja2
- Backend: FastAPI
- AI Integration: Gemini Flash, Gemini Pro and Stable Diffusion
- Designed the flow from user input → AI generation → comic preview → PDF export
- Created separate pages for input, preview and export success

WOW!

Project Planning Phase

- Model selection and architecture
- Development environment setup
- Core functionality development
- FastAPI routing and backend integration
- Frontend development
- Local deployment and testing

WOW!

Project Development Phase

- Developed generate_outline()
- Developed generate_story()
- Developed generate_image()
- Developed build_comic_layout()
- Developed save_pdf()
- Integrated FastAPI routes and Jinja2 templates

WOW!

Project Testing Phase

- Started the application using Uvicorn
- Tested the /generate route
- Tested /generate-comic/json API
- Tested image generation using /test-image
- Tested FastAPI /docs
- Verified the complete comic generation and PDF workflow

WOW!

Project Documentation Phase

- Documented system architecture and workflow
- Documented AI models and their responsibilities
- Documented backend routes and core functions
- Documented frontend templates
- Documented installation, environment setup and deployment
- Documented future enhancements

WOW!

Project Demonstration Phase

- Open ComicCraft homepage
- Enter a sample story prompt
- Select character, setting, tone and art style
- Generate the comic
- Display generated panels and narration
- Download the comic as a PDF
- Show the export success page

WOW!

ComicCraft AI Generation Workflow

USER INPUT → GEMINI FLASH → GEMINI PRO → STABLE DIFFUSION

Prompt & preferences → 5-panel outline → Story/dialogues → Comic illustrations

→ LAYOUT BUILDER → FPDF PDF EXPORT → COMIC PREVIEW & DOWNLOAD

WOW!

Technologies Used

PYTHON • FASTAPI • UVICORN • JINJA2

GOOGLE GEMINI • HUGGING FACE DIFFUSERS • STABLE DIFFUSION

PYTORCH • FPDF

Conclusion

- End-to-end AI comic generation experience
- Combines AI storytelling with AI-generated illustrations
- Converts personalized prompts into structured comic panels
- Provides preview and downloadable PDF output
- Future scope: user profiles, comic libraries and multi-page story arcs

WOW!

THANK YOU!
